PROFILE

Computer Science graduate building a strong foundation in web development with a focus on creating responsive and user-centered applications. Actively seeking opportunities to contribute to real-world projects while further developing skills in front-end development, alongside continued exploration of game development.

SKILLS

- HTML
 - CSS
 - JavaScript
 - C#
 - Unity
 - Python
-

HIGHLIGHTED PROJECTS

AutoVision

Developed an Android application in a group of 3 for exterior sedan damage detection and repair cost estimation using YOLOv8. Trained the model on approximately 12,000 annotated vehicle damage images, enabling real-time detection of dents, scratches, and other exterior damages with automated cost estimation. Presented as a thesis project at the MLHMI 2026 Conference Hokkaido Sapporo Japan and its accompanying research paper was accepted for publication in IEEE Xplore..

CellScope

Developed an Android application in a group of 3 as a final project for App Development that automatically detects and classifies blood cell types using a YOLOv8 computer vision model trained on approximately 31,000 annotated blood cell images. The application provides real-time blood cell identification along with concise educational information to assist medical students in learning hematology. The project was presented at the ICECCME 2026 Conference in Bali, Indonesia, and its accompanying research paper was accepted for publication in IEEE Xplore.

CERTIFICATIONS

Start the UX Design Process: Empathize, Define, and Ideate

Programming Foundations: Data Structures (2023)

Agile Software Development: Clean Coding Practices

Agile Software Development: Refactoring

Unity 2023 Essential Training

Programming for Everybody (Getting Started with Python)

EDUCATION

Mapua Malayan Colleges Mindanao 2018 - 2026

Graduate of Bachelors of Science in Computer Science
Senior Highschool

Brainworks Inc. 2011 - 2017

Elementary and Junior Highschool
