EDUCATION

Mapaua Malayan Colleges Mindanao

Davao City, Philippines

Bachelor of Science in Computer Science

May 2026

Relevant Coursework: Web Development, Human-Computer Interaction, Database Systems, UI/UX Design Principles

TECHNICAL SKILLS

Programming

HTML, CSS, JavaScript, C#

Tools & Platforms

Git, GitHub, MySQL, Unity

PROJECTS

Task Management System

2024

College Project

- Developed a Task management system that can plan and track tasks.
- Used Visual Studio to create an application with MySQL local database.

Arc.Hive: Laundry Management system

2024

College Project

- Developed a Management System for a laundry shop as a web application.
- Built the system using Visual Studio for development and implementation of the web interface.
- Designed and managed the backend database using MySQL for storing customer, order, and transaction records.
- Collaborated with team members to implement core features such as order tracking and record management.

CellScope: Android Application

2025

College Project

- Developed an Android application that performs blood cell detection and classification using a trained YOLOv8 object detection model.
- Integrated the model into a mobile environment using TensorFlow Lite and PyTorch.
- Collected and preprocessed annotated medical image datasets, including image augmentation and label formatting for YOLO training.
- Consulted a medical professional to validate dataset labels.
- Evaluated model performance using metrics such as precision, recall, and mAP (mean Average Precision).

Autovision: Android Application

2026

Thesis Project

- Developed an Android application that detects and estimates external damage of Sedan Vehicles using YOLOv8 object detection and Decision trees for cost estimation.
- Integrated the model into a mobile environment using TensorFlow Lite and PyTorch.
- Collected and preprocessed annotated damaged vehicle image datasets, including image augmentation and label formatting for YOLO training.
- Collected damage pricing from 2 auto shops and 1 insurance company for the dataset of the Decision trees.
- Evaluated model performance using metrics such as precision, recall, and mAP (mean Average Precision).

Arcade catching game

2026

Personal Project

- Developed a personal practice project in game development to build foundational skills in Unity and 2D game mechanics.
- Implemented core gameplay systems including character movement, object spawning, collision detection, and game loop logic.
- Designed and developed health and scoring systems to track player performance and game stat.
- Created and integrated basic UI elements, including score display, health indicators, and simple game over/restart screens.

Roguelike dungeon

2026

Personal Project

- Developed a personal practice project in game development to explore core roguelike dungeon mechanics using Unity.
- Implemented a wave-based system total of 10 waves featuring progressively challenging enemy encounters and a boss fight.
- Created player combat mechanics including basic attack system, movement, and health management.
- Designed and implemented potion buff system for temporary health and damage enhancements.
- Built enemy AI and wave spawning system, including a final boss encounter.
- Applied object pooling to optimize performance and reduce runtime instantiation overhead.
- Developed UI system using pixel art assets, including health bars, wave indicators, and game state screens.

EXPERIENCE

Ollopa Corporation

Quezon City, Philippines

Web Development and Operations Department Virtual Assistant

December 2025 – March 2026

- Assisted in developing front end web applications using HTML CSS and JavaScript.
- Assisted the Operations team in daily administrative and workflow coordination tasks.
- Assisted in managing and updating internal spreadsheets and databases for tracking tasks, schedules, and operational reports.

AWARDS & RECOGNITION

Presented Thesis project at MLHMI 2026 international research conference in Hokkaido University, Sapporo, Japan.

Presented College Project Cellscope at ICECCME 2026 international research conference in Bali, Indonesia.

TOEIC:

Speaking – 160

Writing – 150

Listening & Reading - 775

Dean's List

2020, 2023, 2024, 2025
